# Pumpkin Template

## Carving Depth Guide

### - Don't cut

There's no need to carve this area. Leave the outer skin or rind of the pumpkin intact.

### - Cut halfway

Remove the skin, carve away until about halfway through the pumpkin. Carve deeper if you would like more light to shine through the pumpkin's pulp layer but don't cut all the way through to the center layer.

### - Cut out

Carve deep until you reach the center layer of the pumpkin. Remove the cut piece from the pumpkin entirely to let the light shine through brightly.

**Please be careful when carving.** Keep hands at a safe distance from the knife, take your time and always cut away from your body. Store knife safely away from small children.
